Profile

Custom Software Engineer Analyst with extensive experience in developing and testing healthcare and logistics applications at Accenture. Demonstrates proficiency in SQL, Java programming, and JavaScript, leveraging Agile and scrum frameworks to enhance project delivery. Notable achievements include creating a comprehensive smoke test suite using Playwright and deploying automation scripts with Git integration. Skilled in Azure Pipelines, Rest Assured, Swagger, Postman, GitHub, and TestNG to ensure application stability and cross-browser testing accuracy. Career goals include advancing expertise in software engineering to drive innovation in automated testing solutions.

Education

Bachelor of Technology in Computer Science   Jul 2018 - Jul 2022
International School of Technology and Sciences for Women, Rajamhundry
C.G.P.A: 7.53

Employment

Custom Software Engineer Analyst   Dec 2024 - Present
Accenture, Hyderabad
- Performed testing tasks for healthcare web applications using both manual and automated methods.
- Created comprehensive smoke test suite utilizing Playwright in JavaScript.
- Deployed automation scripts to ADO Repos with Git version control integration.
- Developed Azure Pipeline YAML for automated build processes.
- Scheduled automated smoke tests at client-defined intervals to maintain application stability post-deployment.
- Engaged in Agile practices through regular sprint planning, scrum meetings, and sprint reviews.

Custom Software Engineer Associate   Dec 2022 - Nov 2024
Accenture, Hyderabad
- Managed test cases, plans, and scripts for logistics application UI and API testing
- Acted as liaison for designated stories, managing test execution and failure analysis.
- Worked with developers to fix defects and uploaded test evidence to Azure DevOps.
- Enhanced cross-browser testing accuracy through Playwright automation.
- Performed testing tasks for healthcare web applications using manual and automated methods to ensure functionality and reliability.

Achievements

- Recognized for outstanding testing contributions by receiving the **Sparkling Star award** during initial project engagement.
- Awarded the **ACE Extra Mile Award** for excellence in completing comprehensive regression testing during critical go-live phase.
