DEDEEPYA SAJJA

Playwright • JavaScript • Appium (Mobile Web) • Azure DevOps • CI/CD

+91 7989013720 dedeepyachowdary201@gmail.com Hyderabad, India SajjaDedeepya sajjadedeepya.github.io

OVERVIEW

Software Development Engineer in Test (SDET) with 3+ years of experience building and maintaining web and Android mobile-web automation solutions for enterprise healthcare and logistics applications. Hands-on experience with Playwright, JavaScript, Appium, API validation, and Azure DevOps CI/CD pipelines. Experienced in developing scalable automation frameworks, stabilizing regression suites, implementing custom reporting, and supporting end-to-end release validation in Agile teams.

PROFESSIONAL EXPERIENCE

Accenture Dec 2024 – Present

Custom Software Engineer Analyst, Hyderabad

- Developed and maintained Appium-based mobile web automation for Android browser testing, increasing automated validation coverage across critical user journeys.
- Developed and maintained a Playwright automation framework using JavaScript and Page Object Model, supporting 600+ regression scenarios for enterprise healthcare applications.
- Migrated 450+ automation test cases to an Appium-based mobile web automation framework, including framework setup, device/emulator configuration, test stabilization, and execution optimization.
- Designed reusable automation components and improved execution reliability through optimized locator strategies, synchronization handling, and framework enhancements.
- Leveraged GitHub Copilot to accelerate large-scale test migration, framework development, and automation maintenance while ensuring code quality and stability.
- Implemented multi-environment Azure DevOps YAML pipelines for automated smoke and regression execution with integrated reporting, screenshots, and artifact publishing.
- Implemented API validations using Swagger-based services to retrieve dynamic test data and prevent execution conflicts in appointment booking workflows.
- Automated scheduled regression executions in Azure DevOps, reducing manual validation effort by approximately 80% and improving release confidence.

Accenture Dec 2022 – Nov 2024

Custom Software Engineer Associate, Hyderabad

- Designed and executed manual and automated test scenarios for healthcare and logistics web applications using Playwright and Azure DevOps.
- Developed and maintained Playwright automation scripts for functional, regression, and end-to-end testing, improving test coverage across critical business workflows.
- Performed API validation using Swagger by verifying request/response payloads, status codes, and business rule compliance across backend services.
- Managed test plans, execution cycles, defect tracking, and release validation activities using Azure DevOps Test Plans.
- Improved regression stability by optimizing selectors, implementing synchronization strategies, and reducing flaky automation failures.
- Collaborated with developers to investigate defects, analyze logs, reproduce issues, and support faster defect resolution.
- Supported sprint releases, UAT testing, production sanity validation, and end-to-end quality assurance activities in Agile environments.

AUTOMATION HIGHLIGHTS

- Built a custom HTML reporting solution using JavaScript, HTML, and CSS to visualize execution metrics, browser details, environment information, execution duration, and pass/fail trends, with automatic publication through Azure DevOps pipelines.
- Integrated Azure DevOps Test Plan reporting to automatically publish test results, screenshots, and failed-step recordings after pipeline execution.

- Built Azure Dashboard visualizations using ADO Test Plan data, enabling stakeholders to monitor execution status, pass percentage, and release readiness without accessing automation reports directly.
- Built an Appium-based mobile web automation framework from scratch and migrated 450+ automation scenarios while maintaining framework stability and reusability.
- Integrated mobile automation suites into Azure DevOps CI/CD pipelines, enabling continuous validation and significantly reducing manual testing effort during release cycles.

EDUCATION

International School of Technology and Sciences for Women
Bachelor of Technology in Computer Science 2018 – 2022
CGPA: 7.53 / 10

TECHNICAL SKILLS

Programming & Automation	JavaScript, Playwright, Appium (Mobile Web), API Validation
Test Automation	E2E Testing, Functional Testing, Smoke Testing, Regression Testing, Cross-Browser Testing, Mobile Web Testing
CI/CD & DevOps	Azure DevOps, YAML Pipelines, Git, Continuous Testing
API & Backend Testing	Postman, Swagger, REST APIs, API Validation
Database	SQL
Reporting & Test Management	ADO Test Plans, HTML Reporting, Azure Dashboards, Execution Analytics
Methodologies	Agile Scrum, Defect Management, Root Cause Analysis

ACHIEVEMENTS

- **Sparkling Star Award** — Recognized for contributions to automation initiatives and improvements in regression execution efficiency.
- **ACE Extra Mile Award** — Recognized for providing critical quality engineering support during a healthcare application go-live.
